## Oklahoma Geologic Foundation Presents Treasures to East Middle School Students

On behalf of the Oklahoma Geologic Foundation, Larry Lunardi presented East Middle School's Science department with a rocks, fossils, and minerals kit this week. The kit was comprised of several variations of different minerals, fossils, and rocks from regions all over the world.

Visiting with 4<sup>th</sup> and 5<sup>th</sup> period students, Mr. Lunardi, a retired geologist, was able to elaborate on many of the specific items he personally assembled for the kit. To list a few, specimens included a large cuboidal pyrite crystal, an Ammonite fossil, a Megalodon tooth, halite crystals, and obsidian. This assortment was acquired through a grant from the Oklahoma Geological Foundation.
